**This application contains claims directed to the following patentably distinct species: The species of Figs. 5A, 11A, 14A, 18A, 21A and 24A.** The species are distinct because the inventions as claimed do not overlap in scope, i.e., are mutually exclusive; the inventions as claimed are not obvious variants; and the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect. See MPEP § 806.05(j). In the instant case, the inventions have a materially different design, mode of operation, function, and effect.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species from the species of Figs. 5A, 11A, 14A, 18A, 21A and 24A for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 11 is generic to the species of Figs. 5A, 11A, 14A, 18A, 21A and 24A.

**This application contains claims directed to the following patentably distinct species: The species wherein the step comprises different and continuous chemical vapor deposition steps.** The species are distinct because the inventions as claimed do not overlap in scope, i.e., are mutually exclusive; the inventions as claimed are not obvious variants; and the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation,

function, or effect. See MPEP § 806.05(j). In the instant case, the inventions as claimed are either capable of use together.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species from the species wherein the step comprises different and continuous chemical vapor deposition steps for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 11 is generic to the species wherein the step comprises different and continuous chemical vapor deposition steps.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
